A Plaque will be sent to the leading people in each class and a Certificate to the first placed member of each Society that participated and are highlighted.

COMMENTS.

HB9ANE I have a dream, only once would I like to experience an International Naval Contest which is the only one event at the fixed weekend! However this year the radio traffic on Saturday on 7mhz confirmed to me that a dream is really a dream only !! and far away from the reality.

I1MQ I enjoyed the contest very much contacting new and above all old friends. Conditions were not good, besides we had very strong QRM from the 9A contest. My vertical antenna helped me on 7mhz and a few on 14mhz but cannot use other bands.

N8NAV Pretty dismal conditions as you can see, have decided to submit a log for the first time ever for a contest.

UA4LS Very difficult to QSO due to the Croatian contest interference.

DL1HBL Sorry no more time for more QSO's we hope more next year.

OH1NAVY The team consisted of OH1WR Rauno Kekäläinen CW, OH1JM Jaakko Männikkö CW, OH1SIC Göran Ingemar Backman SSB CW contest log. We operated from the club station OH1AJ, aka OH1NAVY, with two rigs with linear amplifiers connected to our regular antennas.

I2IGTO It was my duty as IK2SOE to operate on 40m during the Naval contest, but due to illness I2GTO was not able to help out, so limited amount of time on the bands.

CU3HQ The contest was very bad to me but I submit a small log.

DL0MFH There were three operators aboard the MV Cap San Diego, DL5HI, DL8HCI and DK3UZ.

HZ1PS Did not go as well as planned this year, much QRM on 20m and the band closed just after I got started. Unfortunately was unable to work on 40m due to the compound TV, hope to rectify this situation next time.

ON4CDZ It was a great opportunity to exchange with you a serial number and many thanks for the points and multiplier. Sorry to say, I has been negatively surprised by the extremely low number of competitors – especially all those famous RNARS operators, as well as the lack of well known Club stations like GB2RN, OR0BRN and all those German MF Clubs ! For the next coming year I think that the future organizers must make much more publicity concerning this special yearly event amongst the members of their Associations (I mean : INORC , ARMI , RNARS etc etc) if we want to keep alive the spirit of this big special family of ex-Naval operators ! It is only a personal point of view but I hope you will agree with !

G0IBN Where were all the G stations?? 15 minutes before the end 3 G stations came up??!!

M0CEF A hand written log, a few QSO's for fun.

CT1BWW Poor propagation conditions. Lot of fun working Naval Club members I will be back next year. Congrats to everybody and greetings from Portugal.

DF4BV Due to less activity and medium conditions the result is not satisfactory. Lowest since years. Hope others got same problems (hi).

DK8NT It was my 4th contest, and my 1st "small one". Still, I enjoyed it very much! I was motivated by my brother, DL8NBM, who is a MF member and former navy operator. Things were a bit complicated by the Croatian contest in parallel. Good: INC People were calling correctly "CQ Navy..." or "CQ Naval..." or "CQ INC", so all was clear here. However, I got several answers to my own (correct) CQ calls that were clearly Croatian contest participants. I scared some away by asking "Naval ?", but still got some in my log. How are other stations handling these? I did not find a single SSB station, and gave up after two or three tries. Where were they ??? Last but not least: My last QSO was a sked with my brother DL8NBM.

I2AZ Poor conditions on upper bands, a good job on 40 mt, unfortunately few naval stations, not a good contest.

G3RFH Conditions seemed poor. Very noisy on 40m. Very slow going but enjoyed it all the same.

SV1HEM It was a nice contest but very QRM from another cw contest. I hope to cu next year.

DJ6TK I am glad to work so many Navy friends again

DL1STV The conditions in this competition were not the best ones for me. I will try next year again.

I6MAT Just my very first enjoyed participation , I did my best.

PA3EVY Due to poor conditions and other contest, low activity from Naval Members.

PI4MRC Jan PA3EBA said conditions were not too good but it was a nice contest as always.

PA3HFG In spite of the limited number of QSO's I enjoyed it very much.

OM7DX Nice contest, problem is (Croatian - 9A) contest.

DL9CM I missed a lot of ships and other stations.

G3ZGC Only a brief appearance as I had flu.

GW0VSW Here is a small entry for this years INC, had not intended to enter.

PA0VLA Conditions were terrible here, hope it goes better next time.

G3LIK Conditions were not the greatest, but great to hear a lot of familiar calls on the bands. The 9A contest caused a lot of QRM and we should try to avoid this at all costs next year. A lot of stations did not make comments in their summary.

73 Mick G3LIK RNARS 4. (Chairman RNARS).
